### Education

#### AkiraChix

**codeHive** – Diploma in Information Technology  
Feb 2024 – Nov 2024

### Certification

#### AkiraChix

**codeHiveX** – System Design  
Jun 2025 – Sep 2025

### Courses

- Frontend Web Development
- UX Research
- Backend Development
- Data Science
- Product Management
- UI/UX Design

### Technical Skills

#### Frontend

- React
- Next.js
- TypeScript
- Tailwind CSS

#### API integration

- GraphQL
- REST APIs

#### Data Science

- Pandas
- Numpy
- Matplotlib
- Seaborn

#### Testing

- React Testing Library

#### Documentation & Agile

- Notion
- Jira

### References

### Profile

Nataly is a results-oriented software developer recognized for her commitment to delivering impactful digital solutions. She has contributed to projects that significantly enhanced user engagement and optimized performance. She thrives on transforming complex challenges into seamless user experiences, consistently prioritizing clean design and maintainable code that empowers users and delivers measurable value.

### Work Experience

#### Junior Backend Developer

**O7ean** (Nov 2025 – Mar 2026)

- Built and maintained scalable backend APIs using Python and Django REST Framework, supporting core application features and improving API response times by up to 20%.
- Designed and optimized PostgreSQL database schemas and queries, reducing data retrieval time and improving system performance under concurrent usage.
- Deployed and managed backend services on Render, configuring environment variables, CI/CD pipelines, and monitoring to ensure high availability and smooth releases.

#### Software Engineering Intern,

**DigiTax** (Jan 2025 – Jun 2025)

- Implemented a business sharing feature using React, Next.js, and TypeScript, building sender and receiver workflows, enabling over 500 cross-organization business shares in the first quarter, and reducing administrative overhead by 30%.
- Integrated GraphQL and REST APIs for dynamic data fetching in business sharing, reducing data latency by 20% and enhancing user experience.
- Conducted QA testing and wrote unit tests for all assigned features, achieving a 98% pass rate and ensuring high code reliability.

### Projects

#### LostLocate

A centralized system for managing missing persons cases that allows police officers and mortuary staff to input detailed data on missing individuals and unidentified bodies, utilizing fuzzy matching algorithms to identify potential matches quickly, and providing a public interface to promote transparency and community involvement.

#### Task Countdown Timer

The task countdown timer tracks the duration of each activity, providing a detailed record

of the time spent on specific tasks added to the to-do list.
